

## PRESS RELEASE

### **ADOCIA confirms its eligibility for the PEA – PME**

**Lyon, France, March 25, 2016 - ADOCIA** (Euronext Paris: FR0011184241 – ADOC) confirms its eligibility for the “*PEA – PME*” stock savings tax regime, which decree has been published in the French *Journal Officiel* on March 4, 2014 (Decree n ° 2014-283), and which entered into force on March 6, 2014.

To be eligible for the “*PEA – PME*”, the shares must have been issued by a company whose market capitalization is below one billion euros, of which no legal person holds more than 25% of its capital, which has less than 5,000 employees, and an annual turnover not exceeding 1 500 million euros or a total balance sheet less than 2 000 million euros.

Adocia meets all of these conditions.

#### **About ADOCIA**

Adocia is a clinical-stage biotechnology company that specializes in the development of innovative formulations of already-approved therapeutic proteins. Adocia’s insulin formulation portfolio, featuring four clinical-stage programs and one preclinical program, is among the largest and most differentiated in the industry.

The proprietary BioChaperone® technological platform is designed to enhance the effectiveness and/or safety of therapeutic proteins while making them easier for patients to use. Adocia customizes BioChaperone to each protein for a given application in order to address specific patient needs.

Adocia’s clinical pipeline includes a unique formulation of PDGF-BB for the treatment of diabetic foot ulcer and four novel insulin formulations for the treatment of diabetes: two ultra-rapid formulations of insulin analogs (BioChaperone Lispro U100 and U200), a rapid-acting formulation of human insulin (HinsBet U100) and a combination of insulin glargine and a rapid-acting insulin analog (BioChaperone Combo). Adocia is also developing a concentrated, rapid-acting formulation of human insulin (HinsBet U500).

In December 2014, Adocia signed a partnership with Eli Lilly for the development and commercialization of the BioChaperone Lispro programs.

Adocia’s extended, early-stage programs include innovative monoclonal antibody formulations, featuring two ongoing collaborations programs with major pharmaceutical companies in the field, and the delivery of anticancer drugs using the proprietary DriveIn® nanotechnology platform.

*Adocia aims to deliver “Innovative medicine for everyone, everywhere.”*
